HOODS FOR INDUSTRY

For use in industrial or commercial premises where communication is important.

T400

PRODUCT INFO

The T400 is our most popular acoustic phone hood for industrial or other noisy locations. Having a medium density rotationally moulded outer shell, the hood is extremely robust. The interior is lined with rigid perforated PVC, the 25mm cavity being filled with acoustic foam. This combination of materials produce a hood with good acoustic qualities and can be easily cleaned.

The T400 Full Shelf version accommodates desk top phones, wall phones and smaller wall mounted payphones which can be fixed to the back of the hood. Larger wall mounted payphones are fixed to the wall below the cut out in the T400 Half Shelf version.

DIMENSIONS

 Noise Reduction:
 up to -16dB

T4000 ZINTEC

PRODUCT INFO

In internal locations where high levels of noise are a problem, the T4000 is the ideal solution. The hood is manufactured to the same high standards as the T4000 Marine. It has the same acoustic qualities, but being made of mild steel instead of stainless steel, the unit cost is considerably lower.

DIMENSIONS

 Dimensions:

 Noise Reduction:
 up to -23dB

phone

PRODUCT INFO

This colourful all purpose telephone hood is both suitable for commercial locations where appearances are important or industrial premises to brighten up the working environment. The T2000 has been designed to fit above all types of wall mounted payphones. Smaller wall mounted payphones, or intercoms can be fixed into the 450mm high by 250mm wide flat area in the back of the hood.

The thermoset composite moulding is manufactured using the latest RTM MIT process, giving the T2000 considerable strength and resistance to impact. It is suitable for internal or external locations. Recent restyling has also included moulded-in handset graphics to the sides and a discrete flat area to the front which allows the fixing of screen printed graphics.

T5000

T2000

PRODUCT INFO

For external or internal use, the T5000 is designed to attain a high level of noise reduction up to 23dB. Manufactured using generalpurpose resin mat to BS476 Class 1 fire retardency, the T5000 is extremely robust and weatherproof. Inside the hood's outer shell is a perforated polypropylene lining that houses 50mm non-hydroscopic acoustic insulation.

Fitted to the inner back wall is a stainless steel apparatus plate; beneath this plate is a GRP shelf (165mm deep) with easy cable entry. The hood is fixed to the wall via two **galvanised brackets** that are secured through the hood's back panel enabling a load of up to 60 kgs to be safely mounted.

MARINE & HAZARDOUS AREAS

Oil/Gas production platforms, generator and pump rooms, chemical plants, docks, factories, mines.

T4000 MARINE

PRODUCT INFO

The T4000 Marine telephone hood has been designed for use in noisy areas in harsh environments. Manufactured from carefully selected materials, the hood is extremely robust.

The outer shell is stainless steel with a nylon powder coat paint finish, the inner perforated lining has the same paint finish, the 50mm cavity is filled with non-combustible, nonhygroscopic rock mineral wool insulation (density 60kg/m3).

A telephone mounting panel is located in the back of the hood, above the 200mm deep shelf. Cable access to the back of the mounting panel is via a 40mm square hole in the shelf.

The hood is mounted on four rubber anti-vibration fixings.

PRODUCT INFO

The GRP Telephone Kiosk is designed for extremely noisy internal or external installations and is suitable for harsh environments, providing a weatherproof and quieter telephone area.

Manufactured in glass reinforced plastic, the outward opening door has a polycarbonate glazed panel, is fitted with an automatic door closer and has a robust handle. A sloped roof prevents collection of moisture and rainwater. Internally the three sides of the kiosk are prelined with 50mm non-combustible, non-hygroscopic acoustic insulation (density 60kg per cubic metre). This is held in place by galvanised perforated panels. An acoustic slab is placed inside the roof cavity for further insulation. As standard, a telephone mounting panel is fitted to the inner back panel of the kiosk.

Supplied fully assembled, the kiosk can be made available for future dismantling making it possible to install where the fully assembled kiosk cannot fit, through a doorway for example.

Optional extras are lighting and carpeting. A double glazed window can also be fitted to the door upon request.

T2000 MARINE

PRODUCT INFO

The T2000 Marine telephone hood has been designed specifically for installations in hazardous or arduous areas and as such is extremely robust and environment proof. This is reflected in both its manner of construction and the materials used. Typical applications include the offshore and onshore petrochemical industries, the power and construction industries and many more. The hood is manufactured in two halves, using the latest RTM MIT process

The two halves are separate thermoset composite mouldings (BS476 Part 7 Class 1 Surface Spread of Flame) that are bonded together as well as being held with stainless steel rivets. This method of construction means that this model is particularly suitable for hostile marine environments. Telephones can be mounted in the 450mm high by 250mm wide flat area in the back of the hood.

GENERAL PURPOSE HOODS

For public buildings, schools, leisure centres, hotels, remand centres, information points. Provides privacy, attracts attention to the phone, easily cleaned, keeps installation tidy.

The elegant T800 telephone hood has been designed to maximise user comfort and visual appeal in prestige locations. It is suitable for small wall or desk mounted payphones as well as standard telephone instruments. The transparent sides and top of the hood are formed from a single piece of 5mm thick tinted acrylic.

DIMENSIONS

Colour:Grey with tinted acrylicDimensions:H730mm W610mm D420mm Shelf W600 D290

T3000

PRODUCT INFO

The slim-line T3000 Telephone Acoustic Hood is the ideal solution for limited space locations, or where a larger full size hood is not required. It has been designed to fit over wall mounted payphones and has a cut out in the back panel 265mm wide by 140mm high. Manufactured in the same way as the T2000, the T3000 has the same strength and styling qualities, but in a more compact size.

DIMENSIONS

Colour:Blue, Red, Yellow, GreyDimensions:H790mm W740mm D360mm

PRODUCT INFO

Strikingly different in design to existing hoods, the T1000 has considerable visual impact. The onepiece thermoset composite moulding incorporates a back panel, shelf and roof. The curved polycarbonate sides add privacy and enhance the design. Phones or payphones can be shelf mounted, or secured to the wall through the back panel.

DIMENSIONS

T500

Colour: Grey Dimensions: H1000mm W680mm D300mm

PRODUCT INFO

The T500 is a very tough acoustic enclosure designed for noisy areas, where space is limited Manufactured from stainless steel and having a perforated internal lining, the 25mm cavity being filled with fire retardant acoustic foam.

The 242mm wide centre panel has a removable lower panel 220mm high which allows the hood to fit around smaller wall phones, or the phone can be mounted to the wall through this lower panel.

Supplied fully assembled with corner shelves and four wall brackets.
