

T800 ACOUSTIC HOOD

OVERVIEW

The elegant T800 telephone hood has been designed to maximise user comfort and visual appeal in bright, modern locations.

It is suitable for small wall or desk mounted payphones as well as standard telephone instruments. The hood's shelf acts as a useful reading platform for directories, note pads etc.

The sides and top of the hood are formed from a single piece of 5mm thick acrylic.

The thermoset composite moulded back panel incorporates a shelf and enhances the acrylic parts of the hood.

The T800 maximises the space for the user, providing a light and open environment whilst keeping the amount of wall space required to a minimum.
