

GRP MODULAR ACOUSTIC TELEPHONE KIOSK

OVERVIEW

The GRP Telephone Kiosk is designed to provide a weatherproof, quieter communication area for extremely noisy internal or external installations and is suitable for harsh environments,

Manufactured using a robust anodised aluminium framework, tough 'Glass Reinforced Plastic' panels are fitted to the wall, door and roof sections as required.

Internally the kiosk is heavily lined with 25mm non-combustible, non-hygroscopic, sustainable acoustic panels, with excellent noise-absorption

This is a totally modular framework and as such, many configurations are possible. Choose a bigger kiosk, additional panels or a different shape entirely. Many user experience add-ons are also available

Supplied fully assembled, the kiosk is suitable for future dismantling making it possible to install where the fully assembled kiosk cannot fit, through a doorway for example.

The sturdy outward opening door can be fitted with toughened safety glass, translucent polycarbonate or a solid GRP panel. It is fitted with an automatic door closer and has a exterior handle.

The sloped roof is designed for run off of moisture and rainwater. Translucent polycarbonate roof a standard, allowing a source of natural light in

Fitted with a suspended robust floor section and anti-slip matting, the kiosk is further isolated from the floor by anti-vibration mounts

HIGHLIGHTS

- Robust Modular Framework
- Tough GRP Exterior
- Sustainable Acoustic Panels with excellent noise-absorption
- Numerous colour and panel options
- Corporate logos and/or graphics can be applied
- Replace damaged individual panels instead of whole wall sections
- Many user experience add-ons available

ADD-ONS

- Internal lighting
- Adjustable phone/tablet/laptop easel
- Fold-down Stool
- Telephone Socket
- Device charging hub
- Ethernet connection hub
- Mains power point
- Internal fan unit
- Notice board
- Levelling Feet
- Others on request

MEASUREMENTS

Dimensions: Single unit with door - H2086mm W994mm D994mm

Weight: Single unit with door - Approx Kg
