MODULAR MULTIMEDIA KIOSK

OVERVIEW

The Storacall Multimedia Kiosk has been designed to provide a quieter, more private communication/working space, in open plan offices or public areas

Manufactured using high quality anodised aluminium modular extrusions, the structure can easily be extended or configured to order. Choose a bigger kiosk, additional panels or removal of whole sections such as the door. Many user experience add-ons are also available

Wall panels are customisable from a range of colours and materials.

Acoustic panels, clear panels, translucent panels, textured panels or a combination of panels, are all easily fitted, to order. Just let us know what you'd like

Delivered fully assembled, the kiosk can be dismantled on site if necessary, making it possible to install where a fully assembled kiosk cannot fit through a doorway or small space

HIGHLIGHTS

- Robust Modular Framework
- Sustainable Acoustic Panels with excellent noise-absorption
- Numerous colour and material panel options
- Corporate logos and/or graphics can be applied
- Replace damaged individual panels instead of whole wall sections
- Many user experience add-ons available

ORDER OPTIONS

- Acoustic panels
- Coloured panels
- Translucent panels
